Pharos 360 Success Stories

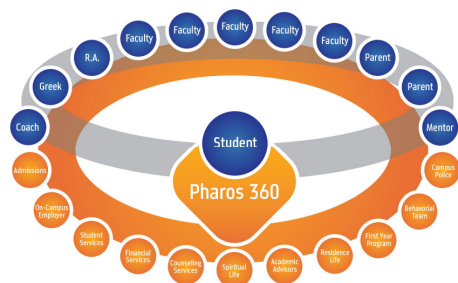

Wheaton College: Building on Successes

Wheaton, IL—Dr. Melanie Humphreys, Dean of Student Care and Services at Wheaton College knows how important it is to respond quickly to students in need. She uses Pharos 360 so that she can have easy access to information about her students no matter what time it is, or where she is.

Last fall, while she was waiting with a student at the hospital, she used the contact information listed on the student's homepage to get in touch her parents to tell them about their daughter's illness. This kind of access to valuable student data means that Melanie is able to make quick decisions about how best to help a student, and allows her to provide instant care to students who are struggling.

Pharos 360 also connects their Student Care Network and other support staff, which means that students experience personal and comprehensive care.

This kind of focus on student's needs is one of the reasons Wheaton's six-year graduation rate increased to 90% this year, an achievement only found among the most outstanding liberal arts campuses in America.
